Welcome to the NALS 2009 Seed Exchange. The seed exchange is the result of the generosity of the members of The North American Lily Society.

**First: We wish to apologize to Maureen Jansen, last year's seed chair for almost completely plagiarizing the comments below. We felt it was more important to get the seed list out to the membership than trying to re-phrase what was said in previous years.**

1. The NALS Seed Exchange Catalog will be mailed by conventional mail to members who requested a paper copy. Copies will be mailed to Donors first, then to overseas members, then to Canadian and U.S. members. The goal is to try to have the list arrive with donors first then all other members at the same time. The list will be published on the NALS website in early March. NALS members who signed up for electronic distribution/notification will receive an email notice of posting which will be timed to coincide with mailed delivery dates. Orders from non-NALS members will not be accepted before April 1, 2009. This list expires June 1, 2009 and may be removed from the NALS website at that time. Please see that your order is received before this deadline.

2. We will continue to accept Visa and Master Card as a form of payment. **Take time to ensure your card information is correct and legible.** PayPal will be accepted again this year. Please read the ordering procedures section below!

3. We are again offering bonus seed to all donors. One (1) free packet will be given for every seed number you have listed. (Maximum of three (3) packets.) If you are a donor, please deduct these bonus seed packets from your cost at the indicated place on the order blank. Because the web based shopping cart does not give donors credit for their free packets, we will select your donor bonus packets from your substitution list, based on your priority. Be sure to list substitutions!

4. **Pictures!** With the assistance of the NALS Webmaster and select donors, we have posted some pictures of the parents of the seeds on the NALS web site. Look for a picture frame ""

that indicates there will be photo(s) available. Photos will be on the web site with the list, (no more hunting for the image!).

**5. Descriptions!** We have tried to include as much of a description as the donor has provided. The better the description, the more likely someone will find a reason to purchase the seed. We assume most of you have access to copies of the RHS International Lily Register; lily books, etc. such that you can look up a description of named lilies. If you do not have the International Lily Register, you can purchase it from the RHS or access the web site created by Gerry Danen at [www.lilyregister.com](http://www.lilyregister.com) and click on Lily Register.

6. Whenever you see a donor remember to thank them for the effort they have put into making the Seed Exchange possible. If the donor took the extra time and effort to submit photos thank them for that additional effort as well! It is the fervent desire of many of the donors that those of you who purchase some of their seed continue their work. Please consider doing so. If you have success with someone's material, let him or her hear about it. Everyone likes hearing about his or her offspring!!

"Thank You" to the following donors:

Forrest Peiper for the Asiatic & Trumpet crosses, Brian Bergman & Joe Nemmer who both sent a wide selection including: Asiatics, Orientals, Aurelians and species, Rainbow Francom & Darm Crook for the excellent selection of species, and Robert Griesbach for his ever popular tetraploids. We also wish to recognise Jurgen Koch, Peter Geiser, David Hercberg and all the other foreign donors who took the time to meet USDA requirements and sent in their crosses. Many donors have taken the time and effort to collect species seed from native stands. If you are fortunate enough to obtain some of this seed please do your part to assure their continued purity and survival.

**7. Some Disclaimers.** Every effort has been made to inspect seed and to ensure that the seed you purchase has visible embryos. Where seed is very small, dark, or where embryos are hard to distinguish we have tried to give some indication of this fact. If you wish clearly visible embryos do not order from these lots. In some cases extra seed has been given to compensate for these conditions.

You may experience reduced germination from some tetraploid crosses. You may also note that tetraploids do not grow as rapidly as diploids do. We have not attempted to compensate for these deficiencies by including extra seed as there is more intrinsic value in tetra seed and the reward from tetras is in the size and form of the resulting plant. You may experience significantly reduced germination from interdivisional offerings.

## **8. Seed Listings**

Seeds are listed by Division and identified by seed number, donor, description, number of seed packets available, and number of seeds in each packet (eg. 8-21 seeds). The seed numbers are interpreted in this way. The first digit identifies the Lily Division or category; the second digit gives the year of the sale (9 for 2009). The other digits identify the seed lot itself. This code establishes a unique number for each lot for ten years.

## **Seed Ordering Procedures**

Please read this section carefully. By following the instructions and suggestions given below you will have the best chance of getting the seeds you want in the shortest possible time. Please follow the directions given in the "Auction" section if you wish to bid on auction items.

1. **Order by mail, email or by web-based shopping cart only** (phone or fax orders not accepted).

2. **Conventional Mail Orders:** Use the order form attached. Order by catalog # only and list your 2nd and 3rd choices (please do not repeat any numbers from the first column as your 2nd or 3rd choices). Be reasonable in your expectations about your chances on small and desirable lots; if you are not a donor, desirable lots containing only a few packets typically sell out within the first 20 or 30 orders (mostly from donors who order early). Prepare your order well. There will be no refunds on cash, checks, PayPal or money orders. If you pay by credit card, you may request that your order be reduced to whatever we can supply and we will recalculate your charge for packets and shipping. A small receipt will be included for charge orders to show the billed amount. **Keep a record of your order, as order blanks will not be returned.**

3. **Electronic Ordering:** You have several options:

- You may scan your paper copy of the filled in order blank and email it to me.
- You may download the form from the website, fill it out and email it to me.
- You may use the shopping cart feature on the website to order seeds. If you use this feature be aware that the web site is not monitoring inventory. Even though a packet is placed in your cart it may not be available. Please list acceptable alternates in the comments box or be willing to accept whatever we substitute.
- Your order will be filled in the order received (including mailed in orders) and held pending payment. Seeds will be shipped when we receive payment. Payment can be made by conventional mail for: checks, bank drafts or credit card information. Customers are encouraged to use PayPal, as we will ship as soon as we receive notification.

4. **Send payment in U.S. currency payable to NALS.**

- Visa and Master Card (only!) are accepted. PayPal accepted. It worked quite well last year. See NALS website for PayPal details . - U.S. members use personal checks, money orders, credit card, or PayPal.
- Canadian members use personal checks (Please mark your check "U.S. Funds", do not calculate monetary exchange rate), Money Orders in U.S. funds, credit card, or PayPal.
- All other members make payments in U.S. funds using bank drafts payable through a U.S. bank, International Money Order, credit card, or PayPal.

5. **Pricing.** Seed is priced at **\$1.05 per packet for 2009**. *.55 cents per packet for previous year's seed and companion seed.*

Included are these additional postage and supply charges:

1- 20 packets: U.S. \$1.50 21 - 40 packets: U.S. \$2.50 40 - 50 packets: U.S. \$3.00 50 + packets: U.S. \$4.00

Please calculate these charges based on the number of packets ordered not the number of seed numbers ordered.

6. **Limitations.** The following limitations are intended to make desirable seeds available to as many members as possible. The filling of seed orders is still on a first-come-first-serve basis, but the chance is better that the seed you desire will still be here when your order arrives.

However, when there are only a few packets of seed, the earlier your order arrives the better your chances.

**a.** The limit on packets for any individual seed number is:

**1** if the total number of packets available is 1-15, **2** if the total number of seed packets is 16-22, **3** if the total number of seed packets is 23-30, **4** if the total number of seed packets is 31 or more.

**b.** The limit for this year's seed is **30 Seed Packets**. There is no limit on the previous year's seed.

7. Some members may want more seeds than the above limitations allow. We will accommodate those members with the following procedure. For orders of this year's seed that exceed 30 seed packets, we will fill your order up to the first 30 seed packets and then suspend your order until March 31, 2009 before completing it. The initial fill will be held until after March 31, 2009 unless you include postage or two separate mailings. Please be sure to include alternate choices if you wish to use this option.

Abbreviations: These abbreviations are used in the list: OP = open pollinated, HP = hand pollinated

(Note: We have assumed that most hybridizers use some means to ensure that their intended cross is protected from previous or unintended pollinations. All of these crosses could be labeled as protected pollination. We have just omitted this designation unless we have been made aware otherwise by the donor), sdg./sdlg = seedling, IE = immediate epigeal, DE = delayed epigeal, IH = immediate hypogeal, DH = delayed hypogeal, w/ = with, OT, O/T = an Oriental/ Trumpet hybrid. Most others are basic. Enjoy this seed list!

### **Auction Items**

The deadline for receipt of auction bids is March 31, 2009. Please submit your bid(s) by mail or email. Submit your bid on a sheet of paper and include not only the seed number and amount bid, but also your name, address and phone number. The minimum bid is \$5.00 per packet. With multiple packet lots, the highest bidders will receive one packet each. If there are identical bids, the earliest one received will be the winner. Do not send money for auction items: We will send seeds to the successful bidders along with an invoice for payment.

<b>NOTES:</b> Lilium davidii yellow variant Asiatic species. The seed parent is a decent form of the species. The pollen was collected off a plant selected by Eddie McRae, reputedly a yellow mutation of L. davidii. Such a mutation has never been reported, but yellow variants of other orange-flowered species are known, so it is possible. Plant looks identical to L. davidii var. unicolor other than flower color. You be the judge.			
M.C.A. = maximowiczii x (Callie x L. amabile)			
P.M.C.A. = pumilum x M.C.A.			
M.C.A.P. = M.C.A. X pumilum

Notes:	KOCJUR – 6025/99.1 – (Louise x L. henryi citrinum) x L.henryi citrinum		
	KOCJUR – 61-378.1 – (L. henryi citrinum 'Beaverton' x L. henryi) – most vigorous, flowers larger, and more starry of siblings. Should carry the recessive yellow of 'Beaverton'		
	KOCJUR – 6114/99.5 (Gold Eagle x Emerald Angels) Good Botrytis resistance		
	KOCJUR – 9320-3/99.1 (from seed exchange 99, 9320) remarkably stiff stem, never many flowers		
	KOCJUR – CK2/01.3 Charles Kroell cross of 2001		

KOCJUR – CK3/01.1 From Charles Kroell seed. Strong Pencil stokes, diluted orange, strong papillae. Good botrytis resistance of the leaves

KOCJUR – CK11/01.10 ((Black Opal x Nikki) x Betty Sturley) Plants are tall, a bit floppy. This sdl expresses a clear white, no orange. My best white.

KOCJUR – CK11/01.10 ((Black Opal x Nikki) x Betty Sturley) Plants are tall, a bit floppy. Sdl expresses a clear white, no orange, high bud count. Good botrytis resistance.

KOCJUR – CK11/01.22 ((Black Opal x Nikki) x Betty Sturley) – orange center but should be recessive for yellow

KOCJUR – E2..1.3 (60-113.1 x L. henryi ‘White Papillae’) Good botrytis resistance, strong, good inflorescence.

KOCJUR – E2..14.1 (9320-3.3 x 60-113.2)

KOCJUR – E2..14.11 (9320-3.3 x 60-113.2) The white papillae of the seed parent are dominant!

KOCJUR – E2..14.12 (9320-3.3 x 60-113.2) No red markings at all and white papillae

KOCJUR – ELG10/03(1) – very good botrytis resistance, very stiff stem, black nectaries, flower buds very attractive with grn overlay. The plant is a clear improvement over both parents (L. henryi x L. rosthornii)

KOCJUR – HK1/03.1 – (RS31 (Holger Kuhne’s L. rosthorni selection) x Louise) ,HK1/03.1 is botrytis resistant, a good pollen parent, poor seed parent, Nectaries more dark green than black. Good branching

KOCJUR – HK3/03.1 – Holgar Kuhne seed (L.henryi ex China black heart x L. rosthorni ‘RS07’) Very good botrytis resistance, very small, dark black nectaries

KOCJUR – HK4/03.2 – (Louis XIV x L. rosthornii’RS07’) Excellent botrytis resistance, black nectaries. The siblings are very similar, with some segregation for black nectaries.

KOCJUR – HK4/03.4 – (Louis XIV x L. rosthornii’RS07’) Excellent botrytis resistance, black nectaries. The siblings are very similar, with some segregation for black nectaries.

KOCJUR – HK5/03 – (White Henryi x CZ Hybrid1)

KOCJUR – Lady Alice 1 – Lady Alice is a very heterogeneous strain, #1 has got almost pure white petals (the color dilutes as flowers age to almost white) susceptible to botrytis

KOCJUR – Lady Alice 2 – Lady Alice is a very heterogeneous strain, #2 is the ‘greenest’ henryi type, botrytis susceptible, weak plant

KOCJUR – Lady Alice 3 – Lady Alice is a very heterogeneous strain, #3 has wide petals and nice markings, botrytis susceptible

KOCJUR – L. rosthornii.3 – The plant is from Chen Yi’s L01. Black Nectaries, good botrytis resistance.

KOCJUR – L. rosthornii.6 – The plant is from Chen Yi’s L01. Black nectaries that seem to attract wasps

KOCJUR – L. rosthornii.8 – The plant is from Chen Yi’s L01. Vigorous, has green nectaries, with black overlay. Excellent botrytis resistance

KOCJUR – L. rosthornii.11 – The plant is from Chen Yi’s L01.Has deepest black nectaries, unfortunately a weak plant.

KOCJUR – Tanecnice – after flowering seed pods and leaves heavily infected with botrytis

ZIUHEN – 03-540 – this is a very large flowered sdl that is textured and pearlescent white

ZIUHEN – 03-657.2 - a seedling from gold eagle with bright yellow flowers and red markings

ZIUHEN – 03-637.2 – asdl from Gold Eagle with strong stems, ruffled flowers and red spotting

ZIUHEN - Halinar seedling pod can get over 8' tall with tertiary buds, bulbs multiply quickly, excellent pod fertility
ZIUHEN - <i>L. henryi</i> citrinum – a seed exchange sdl, good clean bright yellow, nicely marked
ZIUHEN – light yellow seedling – a sdl from gold eaglenwith strong stems light yellow flowers and no spotting
ZIUHEN – S63-591 a seed exchange sdl, great recurved form, clean wt, org, grn color, raised papillae and red markings
ZIUHEN – S83-320 a seed exchange sdl with dark buds and a small bright yellow throat
