		Seeds from previous year	19

Welcome to the NALS 2014 Seed Exchange. The seed exchange is the result of the generosity of the members of The North American Lily Society.

1. The NALS Seed Exchange Catalog will be mailed by conventional mail to members who requested a paper copy. The list will be published on the NALS website for general membership. NALS members who signed up for electronic distribution / notification will receive an email notice of posting which will be timed to coincide with mailed delivery dates.

2. Orders can be placed using the convenient on-line shopping cart structure on The North American Lily Societies web site. Non members can pay for a membership and order from the exchange at the same time. PayPal will be accepted again this year. Please read the ordering procedures section below!

3. We are again offering bonus seed to all donors. One (1) free packet will be given for every seed number you have listed. (Maximum of three (3) packets.) . Donors will be reimbursed through PayPal after their order has been received for the value of their free packets.

4. **Pictures!** With the assistance of select donors, we have posted some pictures of the parents of the seeds on the NALS web site. Photos will be on the web site with the list, (no more hunting for the image!). Click on the thumbnail image to view a larger depiction of the flower, use your back button to return to the list.

5. **Descriptions!** We have tried to include as much of a description as the donor has provided. The better the description, the more likely someone will find a reason to purchase the seed. We assume most of you have access to copies of the RHS International Lily Register; lily books, etc. such that you can look up a description of named lilies. If you do not have the International Lily Register, you can download it from the RHS site.

6. Whenever you see a donor remember to thank them for the effort they have put into making the Seed Exchange possible. If the donor took the extra time and effort to submit photos thank them for that additional effort as well! It is the fervent desire of many of the donors that those of you who purchase some of their seed continue their work. Please consider doing so. If you have success with someone's material, let him or her hear about it. Everyone likes hearing about his or her offspring!!

A Big Thank you to all those who contribute!

7. **Some Disclaimers.** Every effort has been made to inspect seed and to ensure that the seed you purchase has visible embryos. Where seed is very small, dark, or where embryos are hard to distinguish we have tried to give some indication of this fact. If you wish clearly visible embryos do not order from these lots. In some cases extra seed has been given to compensate for these conditions.

You may experience reduced germination from some tetraploid crosses. You may also note that tetraploids do not grow as rapidly as diploids do. We have not attempted to compensate for these deficiencies by including extra seed as there is more intrinsic value in tetra seed and the reward from tetras is in the size and form of the resulting plant. You may experience significantly reduced germination from interdivisional offerings.

8. Seed Listings

Seeds are listed by Division and identified by seed number, donor, and description. The seed numbers are interpreted in this way. The first digit identifies the Lily Division or category; the second digit gives the year of the sale (4 for 2014). The other digits identify the seed lot itself. This code establishes a unique number for each lot for ten years.

Seed Ordering Procedures

Please read this section carefully. By following the instructions and suggestions given below you will have the best chance of getting the seeds you want in the shortest possible time.

1. **Electronic Orders:** Orders can be placed and paid for using Paypal through the North American Lily Society website, utilizing the ordering buttons and shopping cart provided. Inventory is being tracked so you will know if something is sold out.

Mailed orders: If you prefer to mail in your order, a printable order form can be found on the website. Orders are filled on a first come first served basis – so please provide alternate choices should your first choice be sold out.

2. **Pricing.** Seed is priced at **\$2.00 per packet for 2014. \$1.00 per packet for previous year's seed.** The previous seed will be added to the list on April 3rd when order limits are lifted.

Please note new shipping charges are in effect for 2014

	US & Canada	Overseas - International
1-20 pkts	2.00	4.00
21-40 pkts	3.00	5.00
41+ pkts	4.00	6.00

Prices for shipping will be calculated based on quantity of packets ordered and destination for shipment.

3. **Limitations:** The following limitations are intended to make desirable seeds available to as many members as possible. Orders are still filled on a first-come-first-serve basis. Order early to improve your chances. These limits will be lifted on April 3rd.

a. The limit for any individual seed number is: 1 packet

b. The limit for this year's seed is 30 Packets. No limit on the previous year's seed.

4. Time lines anticipated for the seed exchange for 2014

2014 listed fresh seed - 30 packet limit

March 9 -Exchange open to donors only - limit 30 packets. You will be credited back through Paypal for free packet(s).

March 24 - Exchange opens to all current NALS members with limit of 30 packets.

2014 listed fresh seed and previous seed - no limits

April 3 - Exchange open to all members - no limit on quantities ordered

May 4 - exchange open to the general public no limits on quantities

Abbreviations: These abbreviations are used in the list: OP = open pollinated, HP = hand pollinated, PP = protected pollination.

(Note: We have assumed that most hybridizers use some means to ensure that their intended cross is protected from previous or unintended pollinations. All of these crosses could be labeled as protected pollination. We have just omitted this designation unless we have been made aware otherwise by the donor), sdg./sdlg = seedling, IE = immediate epigeal, DE = delayed epigeal, IH =immediate hypogeal, DH = delayed hypogeal, w/ = with, OT, O/T = an Oriental/ Trumpet hybrid. Most others are basic. Enjoy this seed list!
